

# ENERCO INNOVATIONS Website

A modern, responsive website for a solar panel solutions company with job posting functionality.

## File Structure

```
enerco-innovations/
|
├── index.html      # Main HTML file
├── styles.css       # All styling
├── script.js        # JavaScript functionality
└── README.md        # This file
```

## How to Run

### Option 1: Local Development

1. Download all files (index.html, styles.css, script.js)
2. Keep all three files in the same folder
3. Double-click `(index.html)` to open in your browser

### Option 2: Web Server

1. Upload all three files to your web hosting service
2. Ensure all files are in the same directory
3. Access via your domain name

## Uploading to Web Host

### For cPanel/Standard Hosting:

1. Login to your hosting control panel
2. Navigate to File Manager
3. Go to `(public_html)` directory
4. Upload all three files:
  - index.html
  - styles.css
  - script.js

5. Your site will be live at your domain

### For GitHub Pages:

1. Create a new repository
2. Upload all three files
3. Go to Settings > Pages
4. Select main branch and save
5. Your site will be live at `username.github.io/repository-name`

### For Netlify/Vercel:

1. Create account and new site
2. Drag and drop the folder containing all three files
3. Site will be deployed automatically

## ✨ Features

- **Responsive Design** - Works on mobile, tablet, and desktop
- **Interactive Navigation** - Smooth section transitions
- **Job Posting System** - Full job listing and application functionality
- **Contact Form** - For customer inquiries
- **Modern UI** - Clean, professional design with animations

## 🛠 Customization

### Adding New Jobs

Edit `script.js` and add new job objects to the `jobs` array:

```
javascript
```

```
{  
  id: 7,  
  title: "Your Job Title",  
  type: "Full-time", // or "Part-time", "Contract"  
  category: "technical", // or "sales", "admin"  
  location: "Your Location",  
  salary: "Salary Range",  
  description: "Job description...",  
  requirements: ["Requirement 1", "Requirement 2"],  
  responsibilities: ["Responsibility 1", "Responsibility 2"]  
}
```

## Changing Colors

Edit `styles.css` and modify the CSS variables:

```
css  
  
:root {  
  --primary: #f59e0b; /* Main orange color */  
  --secondary: #10b981; /* Green accent */  
  --dark: #1f2937; /* Dark text */  
  --light: #f3f4f6; /* Light background */  
  --white: #ffffff; /* White */  
}
```

## Updating Contact Information

Edit `index.html` in the contact section and update:

- Email address
- Phone number
- Physical address
- Social media links

## Adding Your Logo

Replace the emoji in `index.html` (line with `⚡ ENERCO INNOVATIONS`) with:

```
html  
  

```

## Browser Support

- Chrome (latest)
- Firefox (latest)
- Safari (latest)
- Edge (latest)
- Mobile browsers (iOS Safari, Chrome Mobile)

## Technical Details

- **Pure HTML, CSS, JavaScript** - No frameworks required
- **No dependencies** - Works standalone
- **Lightweight** - Fast loading times
- **SEO-friendly** - Proper HTML structure

## Notes

- Forms currently show alerts (not connected to backend)
- To connect forms to email/database, you'll need backend integration
- Job applications are not stored - implement backend for production use
